Lift and Carry a Seated Patient

### Lift and Carry a Seated Patient Practical

**DIRECTIONS:** Review the Lift and Carry a Seated Patient video in HILT U. Mark whether the candidate completed the task correctly or incorrectly.

Task	Correct	Incorrect	Notes
<u>Use at least three team members</u>			
Explained how the low, medium, and high lift base handles are used to lift patients to different heights.			
Turned HILT to the backside to prepare to roll the ends.			
Positioned the HILT in front of the patient and identified the low, medium, and high lift handles while rolling the HILT.			
Pulled the desired base handles from Velcro tabs depending on the designated lift height.			
Correctly positioned the midpoint of the HILT under the patient's tailbone.			
One patient attendant helped balance the patient within the HILT during the lift.			
Used correct lifting technique to minimize injury exposure to self.			
Lifted the patient in unison with team lift.			
Lowered the patient safely.
